

Hartland Conservation Commission

Minutes: 9-December-2015

Next Meeting: 13-January-2016

Attending: Jennifer Waite, Rob Anderegg, Chris Collier, Dori Galton, Dean Greenberg, Cordie Merritt and Knox Johnson

Topics Discussed:

- Our Minutes from November were approved as written.
- The solar array at Knox's farm will soon be connected to the grid.
- Some time was taken for a discussion of Rob's graphic presentation of our E. coli data. Dori ask if our information should be more widely distributed. It could be posted on the town web site and/or town list serve.
- Safety zone signs have been posted at the 17 acre wood to help ensure the safety of school children using the area. Tim Rockwood has yet to complete the survey of the parcel so there is no further development on the possible incursion.
- The HNC herbarium has been sent to the Pringle Herbarium at UVM. They were very excited to receive it.
- Our annual report is still in the works. Our past AR's have been posted on the town site.
- Guy has found the NE corner of the Sumner's Falls property.
- Guy thought a site visit to the gully forming on the Meacham Farm in N. Hartland would be useful. Dori will contact Guy to see what can be set up.
